Mandolin Chords

G D A E

Root Positions

Mandolin

	G	D	A	E
C	5	10	3	8
Db	6	11	4	9
D	7	0	5	10
Eb	8	1	6	11
E	9	2	7	0
F	10	3	8	1
Gb	11	4	9	2
G	0	5	10	3
Ab	1	6	11	4
A	2	7	0	5
Bb	3	8	1	6
B	4	9	2	7

Fret for the root of each key on each string.
Everything else is measured from there.

Mandolin Circle of Fifths

Outer ring: major.
Inner ring: relative minor.
Both show the most common voicing.

Table of Chords

Mandolin Chords	588 chord voicings
Guitar Chords	567 chord voicings
Ukulele Chords	386 chord voicings
Piano Chords	396 chord voicings
Banjo Chords	384 chord voicings
Bass	roots & patterns
Cello	roots, patterns & 384 voicings
Theory	how the chords are built
Tunings & Credits	back sheet

2,705 chord voicings in all.

Twelve keys for every chord, on each instrument.
x means don't play that string.
r means rootless: for rhythm, not for soloing.
i means the voicing given is an inversion.
Tunings are on the back sheet.

Movable Shapes

Ukulele closed, so they move

shape root on bottom example

major

0003	C	5	1114 = Db
2010	E	3	3121 = Gb
2100	G	R	3211 = Bb
2013	E	3	3124 = Gb

minor

2000	G	R	3111 = Bbm
1013	E	b3	2124 = Gbm
2003	G	R	3114 = Bbm

seventh

0001	C	5	1112 = Db7
0100	A	b7	1211 = Bb7
0212	G	R	1323 = Ab7

Shape is the fingering above its lowest fret.
Slide it one fret, the chord rises a semitone.
Bottom is the degree on the lowest string. The page before gives the fret.

Piano

Circle of Fifths

Outer ring: major.
Inner ring: relative minor.
Both show the most common voicing.

A	A	B	C#	D	E	F#	G#
Bb	Bb	C	D	Eb	F	G	A
B	B	C#	D#	E	F#	G#	A#

Read across: in the key on the left, the four is the note under the 4. A minor key borrows the same row, starting from its six.

Bass

Circle of Fifths

String and fret for each root: **A3** is the third fret of the A string.

Lowest that falls under the hand.

Five-string first, four-string in parentheses.

Root Positions

Bass

	(B)	E	A	D	G
C	1	8	3	10	5
D^b	2	9	4	11	6
D	3	10	5	0	7
E^b	4	11	6	1	8
E	5	0	7	2	9
F	6	1	8	3	10
G^b	7	2	9	4	11
G	8	3	10	5	0
A^b	9	4	11	6	1
A	10	5	0	7	2
B^b	11	6	1	8	3
B	0	7	2	9	4

- Fret for the root of each key on each string. Everything else is measured from there.

Patterns

Bass counted from the root

- Root + fifth + octave** The default. Works under anything in the key.
degree **R 5 8**
string R 1+R 2+R
fret R0 R2 R2
- Major arpeggio** Major, maj7, 6.
degree **R 5 8 3**
string R 1+R 2+R 3+R
fret R0 R2 R2 R1
- Minor arpeggio** Minor, m7, m6.
degree **R 5 8 b3**
string R 1+R 2+R 3+R
fret R0 R2 R2 R0
- Dominant seventh** Any 7 chord. The b7 pulls to the four.
degree **R 5 b7 3**
string R 1+R 2+R 3+R
fret R0 R2 R0 R1
- Minor seventh** The two and the six chord.
degree **R 5 b7 b3**
string R 1+R 2+R 3+R
fret R0 R2 R0 R0
- Walking approach** Leading into the next chord.
degree **R 5 6 b7**
string R 1+R 1+R 2+R
fret R0 R2 R4 R0

Cello

Circle of Fifths

- String and fret for each root: **G3** is the third position on the G string. Lowest that falls under the hand.

Numbers

Cello the major scale, degree by degree

	1	2	3	4	5	6	7
C	C	D	E	F	G	A	B

7	R 3 5 b7	7b9	R b9 3 5 b7
maj7	R 3 5 7	7#9	R b3 3 5 b7
m7	R b3 5 b7	m11	R 9 b3 4 5
			b7

Play the root, and the fifth if there is one.
Add the tone that names the chord, the **b3** or the **b7**, only when it wants hearing.
The rest belongs to whoever is playing chords.

Root Positions

Cello

	C	G	D	A
C	0	5	10	3
Db	1	6	11	4
D	2	7	0	5
Eb	3	8	1	6
E	4	9	2	7
F	5	10	3	8
Gb	6	11	4	9
G	7	0	5	10
Ab	8	1	6	11
A	9	2	7	0
Bb	10	3	8	1
B	11	4	9	2

Fret for the root of each key on each string.
Everything else is measured from there.

Movable Shapes

Cello closed, so they move

shape root on bottom example

fifths

00xx	C	R	11xx = Db5
x00x	G	R	x11x = Ab5
xx00	D	R	xx11 = Eb5
2xx0	C	R	3xx1 = Eb5

major

002x	C	R	113x = Db
x002	G	R	x113 = Ab
30x1	C	R	41x2 = E

minor

001x	C	R	112x = Dbm
x001	G	R	x112 = Abm
2x30	C	R	3x41 = Ebm

Shape is the fingering above its lowest fret.
Slide it one fret, the chord rises a semitone.
Bottom is the degree on the lowest string. The page before gives the fret.

What to Play Under

How to Read a Chord

Most chord books draw a box: a grid of strings and frets with a dot where a finger goes. This one prints the frets as digits. They say the same thing.

Mandolin **2013** and guitar **x32010**. One digit per string, lowest string first, and a dot where the digit says.

Read either the same way. The leftmost digit is the lowest string, 0 is open, x is a string you don't play, and any other number is the fret to stop it at.

A box has to be redrawn when the chord moves up the neck. A digit carries its fret with it, which is why this book fits in a pocket.

Each instrument is printed in its own color, so you can find the page by the ink. This chapter is in black: it belongs to all of them.

The Marks in This Book

- Everything printed beside a chord, and what it means.
- 2013** A voicing. One digit per string, lowest string first, in the instrument's color.
- x** Don't play that string.
- 0** Play it open, no finger down.
- r** Rootless: this shape has no root in it.
- i** An inversion: the root is in there, but something else is underneath.
- C/E** A slash chord. The chord, then the note that goes under it.
- C°** Diminished. Written **Cdim** in some books.
- C+** Augmented, or **Caug**.
- b3** A degree: three semitones up. The flat goes before the number, as a chord symbol writes it.
- Bb** A note. The flat goes after: here it is part of the name.
- Names of notes and chords are red, degrees and intervals yellow, fingerings the color of their instrument.

Notes and Intervals

- Twelve notes, each a semitone apart, and then it starts again. An interval is how many semitones lie between two of them. Every chord in this book is written as intervals from its root, and that is what makes a shape movable: slide it up a fret and every interval in it is unchanged.
- | | | | |
|-----------|-------------------------------|-----------|---------------------------------|
| R | root | 5 | fifth |
| b9 | flat ninth | #5 | sharp fifth, or flat thirteenth |
| 9 | ninth, or second minor third | 6 | sixth, or thirteenth minor |
| b3 | minor third | b7 | seventh major |
| 3 | major third | 7 | seventh |
| 4 | fourth, or eleventh | | |
| b5 | flat fifth, or sharp eleventh | | |
- | | | | | | | | | | | | |
|---|----|---|----|---|---|----|---|----|---|----|---|
| R | b9 | 9 | b3 | 3 | 4 | b5 | 5 | #5 | 6 | b7 | 7 |
|---|----|---|----|---|---|----|---|----|---|----|---|
- Twelve semitones up from any root. Every chord in the book is a handful of these.
- Accidentals are written before the number, the way a chord symbol writes them: **b3**, not **3b**.

Theory Circle of Fifths

- The diagram is a circle divided into 12 segments. The outer ring contains major chords: C, G, D, A, E, B, F#, Gb, Db, Ab, Eb, Bb. The inner ring contains their relative minors: Am, Em, Bm, F#m, C#m, G#m, Ebm, Bbm, Fm, Cm, Dm, Gm. The center shows key signatures: 1b (Bb), 1# (C#), 2b (Bb), 2# (C#), 3b (Bbb), 3# (C##), 4b (Bbbb), 4# (C###), 5b (Bbb), 5# (C##).
- Outer ring: major.
- Inner ring: its relative minor – the same seven notes, counted from the sixth.
- Center: the key signature.

Nashville Numbers

- Name the chords by their degree in the key instead of by letter, and a chart transposes itself. **1 4 5** is the same three chords in every key; the number chart says which letters they are.
- | | | | |
|----------|-------|----------|------------|
| 1 | major | 5 | major |
| 2 | minor | 6 | minor |
| 3 | minor | 7 | diminished |
| 4 | major | | |
- 1** → **4** → **5** → **1**

The most common turn there is, in any key.
- Those are the chords the major scale builds on its own degrees, using only notes from the key. A number on its own means that chord; a quality after it means play that instead, and **4m** in a major key is a borrowed chord rather than a mistake.
- In a minor key the same seven chords are counted from the six. A minor song's home chord is the **6m** of its relative major, or the **1m** if the chart is written in the minor.

The Major Scale

Seven of the twelve notes, in a fixed pattern of tones and semitones. Everything else on these pages is counted against it.

1 then a tone 5 then a tone
2 then a tone 6 then a tone
3 then a semitone 7 then a semitone,
4 then a tone and you are home

1		2		3	4		5		6		7
---	--	---	--	---	---	--	---	--	---	--	---

The major scale inside the chromatic one. The gaps are the notes it leaves out.

The relative minor. Start the same seven notes from the sixth and you have the natural minor of that key. A minor and C major are the same notes; which one you are in is decided by where the music rests.

Why some keys are flat. A scale uses each letter once. In F that forces **Bb** rather than **A#**, because the scale already has an A. The note is one note; the spelling depends on the key it is in, which is why the same key heads one page **Bb** and another **A#**.

The Chromatic Scale

Twelve notes, each one fret or one key apart, and then the whole thing repeats an octave higher. That is every note there is.

A	A#	B	C	C#	D	D#	E	F	F#	G	G#
---	----	---	---	----	---	----	---	---	----	---	----

Sharps going up.

A	Bb	B	C	Db	D	Eb	E	F	Gb	G	Ab
---	----	---	---	----	---	----	---	---	----	---	----

The same twelve, spelled with flats.

Five of the twelve have two names. **A#** and **Bb** are one fret, one key, one sound – which name is right depends on the key you are in, and this book heads those pages with both.

On a fretted instrument one fret is one semitone, so the chromatic scale is just walking up the neck. That is the whole reason a shape with no open strings can be slid: move every note the same number of semitones and the chord keeps its shape and changes its name.

Numbers

Theory the major scale, degree by degree

	1	2	3	4	5	6	7
C	C	D	E	F	G	A	B
Db	Db	Eb	F	Gb	Ab	Bb	C
D	D	E	F#	G	A	B	C#
Eb	Eb	F	G	Ab	Bb	C	D
E	E	F#	G#	A	B	C#	D#
F	F	G	A	Bb	C	D	E
Gb	Gb	Ab	Bb	Cb	Db	Eb	F
G	G	A	B	C	D	E	F#
Ab	Ab	Bb	C	Db	Eb	F	G
A	A	B	C#	D	E	F#	G#
Bb	Bb	C	D	Eb	F	G	A
B	B	C#	D#	E	F#	G#	A#

Read across: in the key on the left, the four is the note under the 4. A minor key borrows the same row, starting from its six.

Why Instruments Are Tuned This Way

The circle is a chain of fifths. So is almost every tuning in this book, and so is the order the sharps and flats are written in a key signature. They are the same chain, read at different speeds.

F	C	G	D	A	E	B
---	---	---	---	---	---	---

The order sharps appear in a key signature, each a fifth above the last. Flats take the same seven backwards.

Read the flat order and you have read a bass: **E A D G**. Four of the seven, in order, because a fourth up is a fifth down.

mandolin **G D A E**, fifths
cello **C G D A**, fifths
bass **E A D G**, fourths
guitar **E A D G B E**, fourths with one third
ukulele **G C E A**, fourth, third, fourth

Fifths reach far: a mandolin crosses two octaves on four courses, and its chords ask for stretches. Fourth keep the notes close, so a guitar barres six strings with one finger. Two answers to the same chain.

How Chords Are Built

- Take a scale degree and stack thirds on it: skip a note, take a note. Three of them is a triad, four is a seventh chord, five is a ninth, and so on up. The chord is named for the highest third.

triad	R 3 5
seventh	R 3 5 7
ninth	R 3 5 7 9
eleventh	R 3 5 7 9 11
thirteenth	R 3 5 7 9 11 13

R → 3 → 5 → 7 → 9 → 11 → 13

Every step is a third. Take three and you have a triad; keep going and you name the chord for the last one.

- A thirteenth chord has seven notes and you have four fingers, so the stack is a claim about which notes belong, not an instruction to sound all of them. What to leave out is on the rootless page.
- Added against stacked.** An **add9** has no seventh: the ninth is added to a triad rather than reached by stacking past a seventh. That is the whole difference between **Cadd9** and **C9**, and it is why the book prints both.

Sixths

- R → 3 → 5 → 6
A triad with a sixth added, not a seventh.

6 R 3 5 6

A major triad with the sixth added. Warmer and less final than a seventh: ends a song without closing it.

m6 R b3 5 6

- Minor triad, major sixth. The sixth stays major – that is what keeps it from being a m7b5 rooted elsewhere.

6/9 R 9 3 5 6

Sixth and ninth, no seventh. All color and no pull, which makes it a good last chord.

Ninths

- R → 3 → 5 → b7 → 9
The seventh has to be there for it to be a ninth.

9 R 9 3 5 b7

A seventh with the ninth stacked on. The seventh has to be there; without it you have an add9.

maj9 R 9 3 5 7

- Major seventh plus ninth. On four strings the root is the first thing to go.

m9 R 9 b3 5 b7

Minor seventh plus ninth.

add9 R 9 3 5

The ninth added to a plain triad, no seventh. Written **2** in some books and **add2** in others.

- madd9** R 9 b3 5
The same over a minor triad.

Elevenths and Thirteenths

- R → 3 → 5 → b7 → 9 → 11 → 13
Seven notes and four fingers. The 5 goes first, then the R, then the 11 unless it is the one you came for.

11 R 9 3 4 5 b7

The eleventh over a dominant. The third is usually dropped: a natural eleventh sits a semitone above it and the two fight.

- 13** R 9 3 5 6 b7

The thirteenth over a dominant. The same note as the sixth, an octave up, over a chord that has a seventh.

m13 R 9 b3 5 6 b7

The same over a minor seventh.

maj13 R 9 3 5 6 7

And over a major seventh.

- 7#11** R 3 b5 5 b7

The raised eleventh, which does not fight the third. The lydian dominant sound.

- Only the guitar has strings enough to voice these, so they appear on its pages and nowhere else.

Sevenths

R → 3 → 5 → b7
The fourth third. Everything past it is color.

7 R 3 5 b7

Major triad, minor seventh. The blues chord, and the one that pulls to the fourth.

maj7 R 3 5 7

Major triad, major seventh. Still: it is not pulling anywhere.

m7 R b3 5 b7

Minor triad, minor seventh. The workhorse of the two chord.

dim7 R b3 b5 6

Minor thirds all the way up. Symmetrical, so one shape names four chords, three frets apart.

m7b5 R b3 b5 b7

A diminished triad with a minor seventh. The two chord of a minor key. Also called half-diminished.

7sus4 R 4 5 b7

A seventh with the fourth in place of the third. Suspends the pull without canceling it.

7sus2 R 9 5 b7

The same idea with the second. Not voiced in this book.

7b5 R 3 b5 b7

Flatten the fifth of a seventh. It shares three notes with the 7b5 a tritone away, which is why the two stand in for each other.

7#5 R 3 #5 b7

Raise it instead. Reads as an altered dominant, and sits well before a minor chord.

Triads

major R 3 5

The default. Three notes, and the one every other chord is measured against.

m R b3 5

Lower the third a semitone. Everything else stays.

5 R 5

Root and fifth, no third: neither major nor minor, so it sits over either. Loud guitars live here.

+ R 3 #5

Raise the fifth. Restless – it wants to rise to the next chord's root.

dim R b3 b5

Lower the third and the fifth. Tense and unstable; usually passing through on the way somewhere.

sus2 R 2 5

The third is replaced by the second, not joined by it. Open and unresolved, and neither major nor minor.

sus4 R 4 5

The third replaced by the fourth. Leans hard on whatever follows it.

Inversions

A chord is its notes, in any order. Put a note other than the root at the bottom and you have an inversion: the same chord, sitting differently.

root C E G

first E G C

second G C E

C/E the chord, a slash, and the note that goes underneath it

i this book's mark for a voicing whose lowest note is not the root

C → C/E → C/G
One chord, three bass notes.

Written **C/E** and **C/G** – the chord, a slash, the note underneath. Use them to give the bass a line to walk: **C**, **C/B**, **Am** descends by step where three root positions would jump.

On four courses the lowest string is often not the root whether you meant it or not. Where that happens the voicing is marked **i**. It is not a fault. It is a warning that the bass note is doing something, and that if someone else is playing the root you may be hearing a chord neither of you named.

Altered Ninths

R → 3 → 5 → b7 → b9
The alteration is the last note. Everything under it is an ordinary seventh chord.

7b9 R b9 3 5 b7

Dominant with the ninth flattened. Four of its five notes are a diminished seventh.

7#9 R b3 3 5 b7

Dominant with the ninth raised – the same pitch as a minor third, which is why it sounds like major and minor at once.

9b5 R 9 3 b5 b7

A ninth with the fifth flattened. Not voiced in this book.

9#5 R 9 3 #5 b7

A ninth with the fifth raised. Not voiced in this book.

9sus4 R 9 4 5 b7

A ninth suspending the fourth. Not voiced in this book.

m11 R 9 b3 4 5 b7

Minor ninth with the eleventh on top. Six notes, so something is always dropped.

Rootless Voicings

- Four strings, six notes. Something goes. The order to drop them in:
 - first** **5**, which says nothing the root has not
 - then** **R**, if a bass is playing it
 - never** **3** or **b3**: they decide major or minor
 - never** **b7** or **7**: they decide which seventh
 - r** this book's mark for a voicing with no root
- | | | | |
|---|---|---|----|
| R | 3 | 5 | b7 |
|---|---|---|----|

A seventh chord, whole.

	3		b7
--	---	--	----

The same chord, root and fifth gone. Still a seventh: those two name it.
- A voicing with no root is marked **r**. In a band it is often the better chord: the bass has the root, and what you have left carries the harmony. Alone it sounds like a different chord, because it is one.
- It is why **Cmaj9** and **Em7** can be four identical notes.

Two Voicings for Every Chord

- On a piano there is nothing but choice**, so the piano pages print two voicings for every chord. The first is closed, the notes in order from the root. The second is the spread voicing: root and fifth low for the left hand, then the color above it with the third on top, which is where the ear goes looking for it.
- | | | |
|--------------|-------------------|--------|
| C | C E G | closed |
| | C G C E | open |
| Cmaj7 | C E G B | closed |
| | C G B E | open |
| C9 | C E G Bb D | closed |
| | C G Bb D E | open |
- Split them at the hands. The left takes the root and the fifth, the right takes what is left. That is why the spread voicings are written root-and-fifth first: the break in the list is where your hands part.
- The spread voicings are the ones the notebook was written from, and the ones a pianist actually reaches for.

Substitutions

- Chords that share notes can stand in for one another.
- relative** **1** and **6m** share two notes. So do **4** and **2m**.
 - tritone** Any **7** chord can be replaced by the **7** a tritone away. They share the third and the seventh, swapped.
 - sixths** A **6** will stand in for a **maj7** at the end of a phrase, and lands softer.
 - sus** A **sus4** before the chord it resolves to buys a beat.
 - dim7** Four chords at once: every three frets is the same shape and the same notes, so one grip covers four roots.
- | | | | | |
|-----------|---|-------------|---|----------|
| 2m | → | b2 7 | → | 1 |
|-----------|---|-------------|---|----------|

The tritone substitution: put a **b2 7** where the **5** was and the bass walks down by semitone.
- None of this is a rule. It is a list of places where two chords are close enough that an ear will follow you.

Progressions

Written in numbers, so they work in any key.

- 1 4 5** Almost everything. Folk, blues, country, most hymns.
- 1 5 6m 4** The four chords a great many pop songs are made of.
- 2m 5 1** The turn jazz is built on. The 2m and the 5 share three notes.
- 1 6m 4 5** Fifties doo-wop.
- 6m 4 1 5** The same four chords, starting from the minor.
- 1 4 1 5** Twelve-bar blues in outline. Make all three sevenths.

1 → **5** → **6m** → **4**
Four chords, a great many songs.

The pull of **5** to **1** is the engine. It comes from the tritone inside the seventh chord: the third and the flat seventh are six semitones apart, and both want to move a semitone.

Open and Closed Voicings

Two ways to arrange the same notes. A **closed** voicing packs them into a single octave, stacked as tightly as they go. An **open** voicing lifts one of the inner notes an octave and lets the chord breathe across a wider span.

Closed. Three notes inside one octave.

Open. The same chord, spread past the octave, with the third on top.

Closed voicings turn to mud low down, where the overtones of notes a third apart collide. Open ones give each note room, and they make the move to the next chord easier, because a note that is already spread has somewhere to go.

On a fretted instrument you get what the tuning gives you. A mandolin or a cello is tuned in fifths, so its shapes come out open whether you meant them or not. A guitar's barre chords are close voicings with an octave doubled on top. There is not much choice in it.

Tunings

Mandolin **G D A E**

Tuned in fifths. Fiddle / violin and tenor banjo share it, so these pages serve all three.

Guitar **E A D G B E**

Standard. A baritone ukulele is the top four strings: guitar shapes with the lowest two muted transfer directly.

Ukulele **G C E A**

Soprano, concert, tenor and low-G. Re-entrant, so "lowest first" means leftmost, not lowest-pitched.

Piano **A B C D E F G**

Note names, low to high, as played.

Banjo **(G) D G B D**

Open G (gDGBD). Numbers cover the four long strings; the 5th is a drone, spiked rather than fretted.

Bass **(B) E A D G**

The guitar's lowest four strings, an octave down.

Cello **C G D A**

Tuned in fifths, a fifth below the mandolin. Viola is the same four notes an octave up, so these pages serve both.
