A shell is the chord with its fifth taken out. The fifth says nothing about the chord, and leaving it out gets the third and the seventh, the two notes that do, under one hand.

The ninth chords go further and drop the root as well: the bass has it. Third, seventh, ninth is the whole sound.

For inversions, take whichever one moves least from the chord before it. Holding a common tone and stepping the rest is what makes a progression sound joined up rather than jumped between.

Play the root, and the fifth if there is one.

Add the tone that names the chord, the **b3** or

the **b7**, only when it wants hearing.

The rest belongs to whoever is playing chords.

Read across: in the key on the left, the four

chord is the column headed 4. Call a song in numbers and it transposes itself.

## Tunings

### Mandolin G D A E

Tuned in fifths. Fiddle and tenor banjo share it, so the mandolin pages serve all three.

### Guitar E A D G B E

Standard. A baritone ukulele is the top four strings: guitar

shapes with the lowest two muted transfer directly.

### Bass (B) E A D G

The guitar's lowest four strings, an octave down.

### Ukulele G C E A

Soprano, concert and tenor. Re-entrant: the 4th sounds

above the 3rd, so "lowest first" means leftmost. Low-G is the same.

### Banjo (G) D G B D

Open G (gDGBD). Numbers cover the four long strings; the 5th is a drone, spiked rather than fretted.

### Piano

Note names, low to high, as played.

The natural minor. Players often raise the seventh of the five chord to make it dominant, which turns 5m into 5.
